

80302

21 March 1967

Dear Henry:

It was good news indeed to know you're willing to take on the chore of being M.C. at the dedication exercises. Needless to say, your estimate of your talents in this line is far too modest!

At the moment it looks as if the order of brief remarks will be something like the following:

1. Governor Love
2. Senator Allott
3. Lee Haworth
4. Phil Handler
5. I. M. Pei
6. (Time and weather permitting), W. O. Roberts

How does this sound to you?

Dick Kassander has agreed to give an informal history of NCAR, UCAR, and the atmospheric sciences (projected into the future as well as the past) as an after-luncheon talk. I plan to ask Horace Byers to introduce him.

We're going to print the program soon, so I'd appreciate a phone call if you think we've overlooked anything important.

With all best wishes.

Sincerely,

Dr. Henry G. Houghton
