### Bondi Exhibits Paintings at NCAR

Boulder, Colorado---Mike Bondi will exhibit paintings August 1 through August 31 at the National Center for Atmospheric Research (NCAR). The works will hang in the second-floor gallery of the NCAR Mesa Laboratory at the west end of Table Mesa Drive. The Laboratory is open to visitors from 8 a.m. to 5 p.m. weekdays.

A native of Wisconsin, Bondi settled in Boulder in 1973. His paintings, primarily ink and watercolor, have been influenced by his European travels where he used the different styles of architecture in each country as his subject matter. He began painting the different cityscapes of Colorado, since moving to Boulder. He has shown his works in several Boulder galleries, most recently at Milly Beavers Fine Art.
