

Data quality assurance and provenance tracking in ICOADS Release 3.0

**Thomas Cram
Steven Worley, Zaihua Ji, and Doug
Schuster**

NCAR, Computational Information Systems
Laboratory (CISL)

AGU Fall Meeting

IN33D-01
December 13, 2017

About the RDA

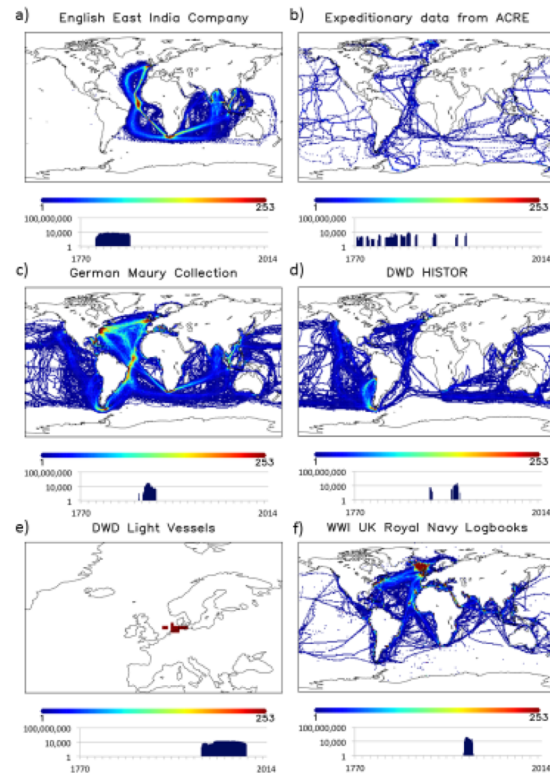

- NCAR's **R**esearch **D**ata **A**rchive
- Purpose
 - Support climate & weather research at NCAR and UCAR universities with reference datasets
- Collections
 - Ocean & atmospheric observations, analyses, reanalyses, operational NWP products
 - Established in 1960s
 - 700+ datasets, 8M files, 1.8 PB
 - 70+ datasets growing daily-monthly
- Free and open access
- Worldwide usage
- Science educated staff

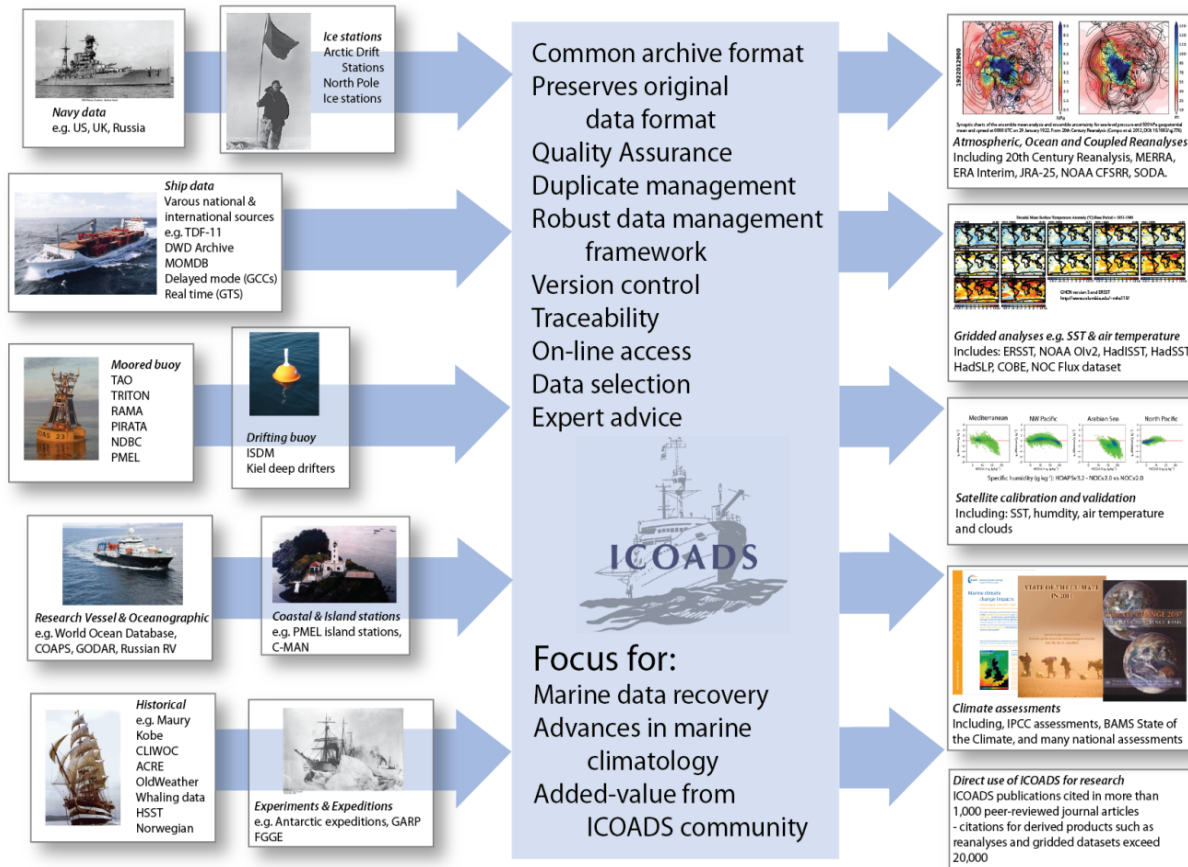

ICOADS overview

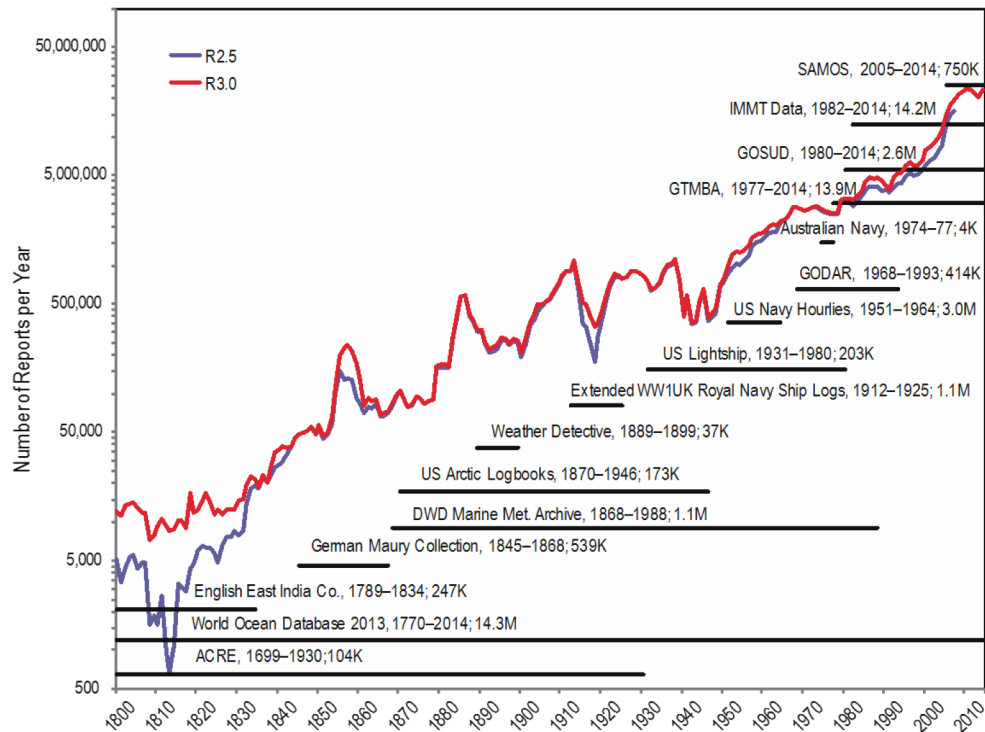

- **I**nternational **C**omprehensive **O**cean **A**tmosphere **D**ata **S**et
- World's most extensive collection of marine *in situ* data
- Foundational dataset for climate research
- **Release 1.0**
 - Published 1985
 - Temporal coverage 1854–1979
- **Release 3.0**
 - Published June 2017
 - Temporal coverage 1662–2014
 - NCEP/NCEI near real-time GTS extension (2015—ongoing)
- Access
 - NOAA: icoads.noaa.gov
 - NCAR: rda.ucar.edu/datasets/ds548.0

Sample of recovered and digitized data added to ICOADS R3.0

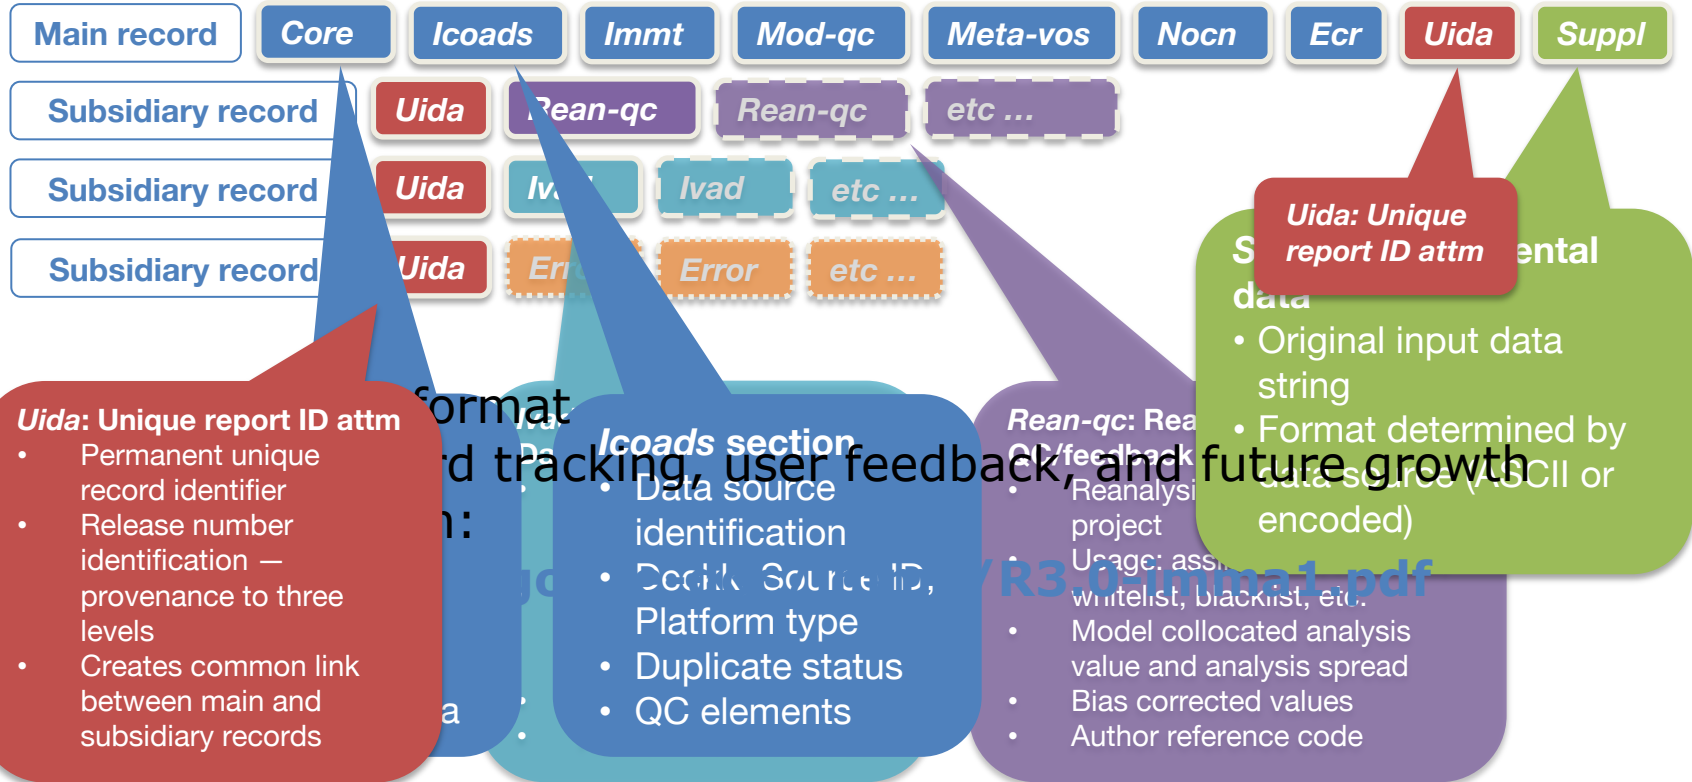

New data sources in ICOADS R3.0

- **Red:** total number of reports in R3.0
- **Blue:** total number of reports in R2.5
- Horizontal black lines: primary data collections added to R3.0

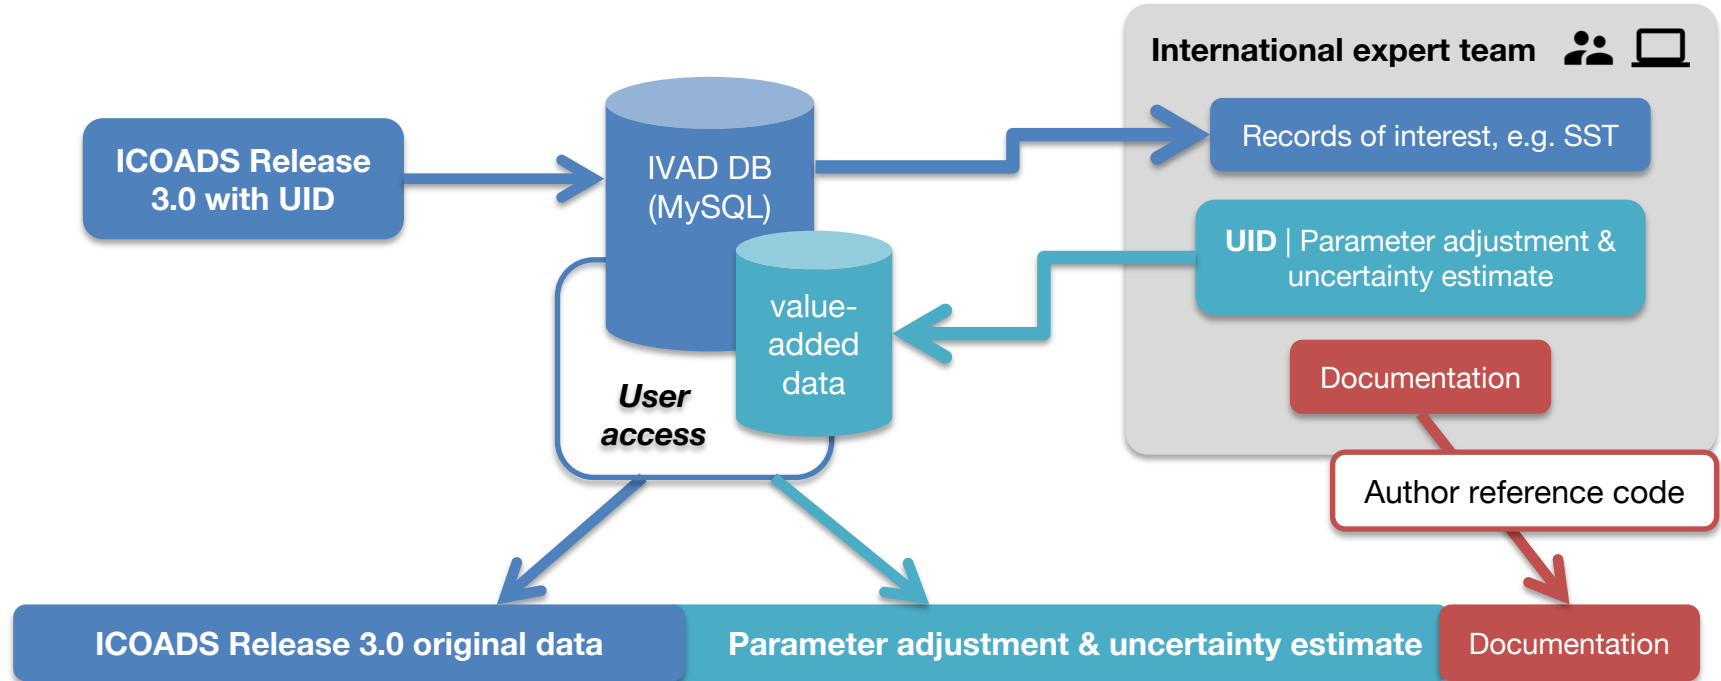

**455+ million
records in total**

International Maritime Meteorological Archive (IMMA1) format

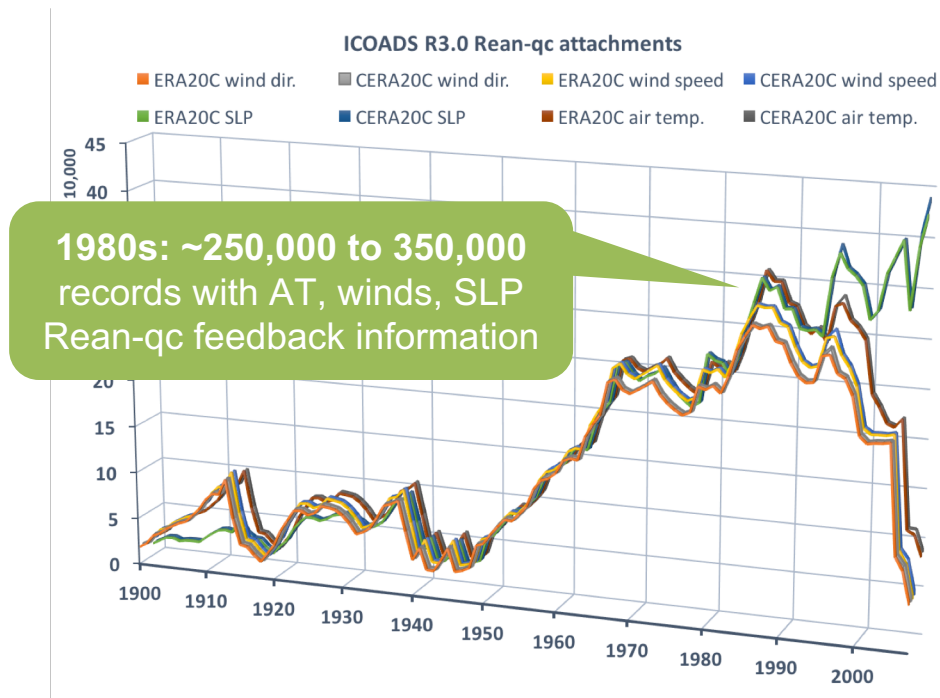

ICOADS Value-added Database (IVAD)

Data flow, feedback management, user access

Current *Ivad* & *Rean-qc* attachments

- ***Ivad***: Value-added data
 - Berry et al. (2004) air temperature adjustment
 - Smith et al. (2015) Beaufort wind adjustment
- ***Rean-qc***: Reanalysis/QC feedback
 - ECMWF ERA-20C: 20th century reanalysis
 - ECMWF CERA-20C: 20th century coupled reanalysis
- **Potential future contributions**
 - FSU Atlantic wind indices (S. Smith)
 - ECMWF ERA-5 feedback (?)

Data quality assurance

Pre-defined trimming levels (based on 3 historical periods)

- Standard
 - 3.5σ threshold
 - Ship obs. only
- Enhanced
 - 4.5σ threshold
 - Ships + buoys + others
- Custom
 - User-defined filters

☐ Standard Filtering

☒ Enhanced Filtering

☐ Make your own Filtering Selection

day/night options	<input checked="" type="checkbox"/> day & night obs.	<input type="checkbox"/> night obs. only	<input type="checkbox"/> day obs. only	
platform type options	<input type="checkbox"/> ships obs. only	<input checked="" type="checkbox"/> ships + buoys + others		
source exclusion flags	<input checked="" type="checkbox"/> used	<input type="checkbox"/> ignored		
NCDC QC flags	<input checked="" type="checkbox"/> used	<input type="checkbox"/> ignored		
outlier trimming level	<input type="checkbox"/> 2.8 sigma	<input type="checkbox"/> 3.5 sigma	<input checked="" type="checkbox"/> 4.5 sigma	<input type="checkbox"/> untrimmed
if trimming flag=11	<input type="checkbox"/> reject obs.	<input checked="" type="checkbox"/> use obs.		<input type="checkbox"/> no effect

Trimming selection interface at rda.ucar.edu/datasets/ds548.0

Summary

- IMMA1 format is designed to support:
 - Record tracking (data provenance)
 - Unique record identification (UID)
 - User feedback
 - Value added data (IVAD)
 - Reanalysis feedback
 - Future growth
 - Encourages further data development & community engagement
 - Enriches the data beyond the scope of primary marine observations
- Completing the data life cycle
