

Kellogg Elected AMS President

Boulder, Colorado---Dr. William W. Kellogg, director of the Laboratory of Atmospheric Science of the National Center for Atmospheric Research (NCAR), has been elected president of the American Meteorological Society (AMS).

Dr. Kellogg's election was announced at the annual national meeting of the Society in New Orleans this week. He will serve as president-elect during 1972 and will assume the presidency of the Society in 1973.

The American Meteorological Society is a national organization composed of persons interested in the advancement of the science of meteorology, its application for the benefit of mankind, and meteorology as a profession.

Dr. Kellogg joined NCAR in 1964 as director of the NCAR Laboratory of Atmospheric Science, one of the Center's two basic research divisions. Prior to that time, he was head of the Planetary Sciences Department of the RAND Corporation in Santa Monica, California.

Dr. Kellogg has served on numerous committees and advisory groups of scientific societies and government agencies. His research interests include man's impact on the environment, the physics of the upper atmosphere, and the use of rockets and satellites in meteorological research. He was one of the organizers and key participants in the Study of Man's Impact on Climate, held last summer in Stockholm, and also participated in the Study of Critical Environmental Problems held in Williamstown, Massachusetts, in 1970.

A graduate of Yale University, Dr. Kellogg holds the doctorate in meteorology from the University of California at Los Angeles. During World War II, he served as a pilot-weather officer in the U.S. Army Air Force. He is a professional member and fellow of the American Meteorological Society, a fellow of the American Geophysical Union, and a member of the Society of Sigma Xi.
