

ICOADS Release 3.0: New Relevance and Support for Reanalyses

Thomas Cram and Steven Worley

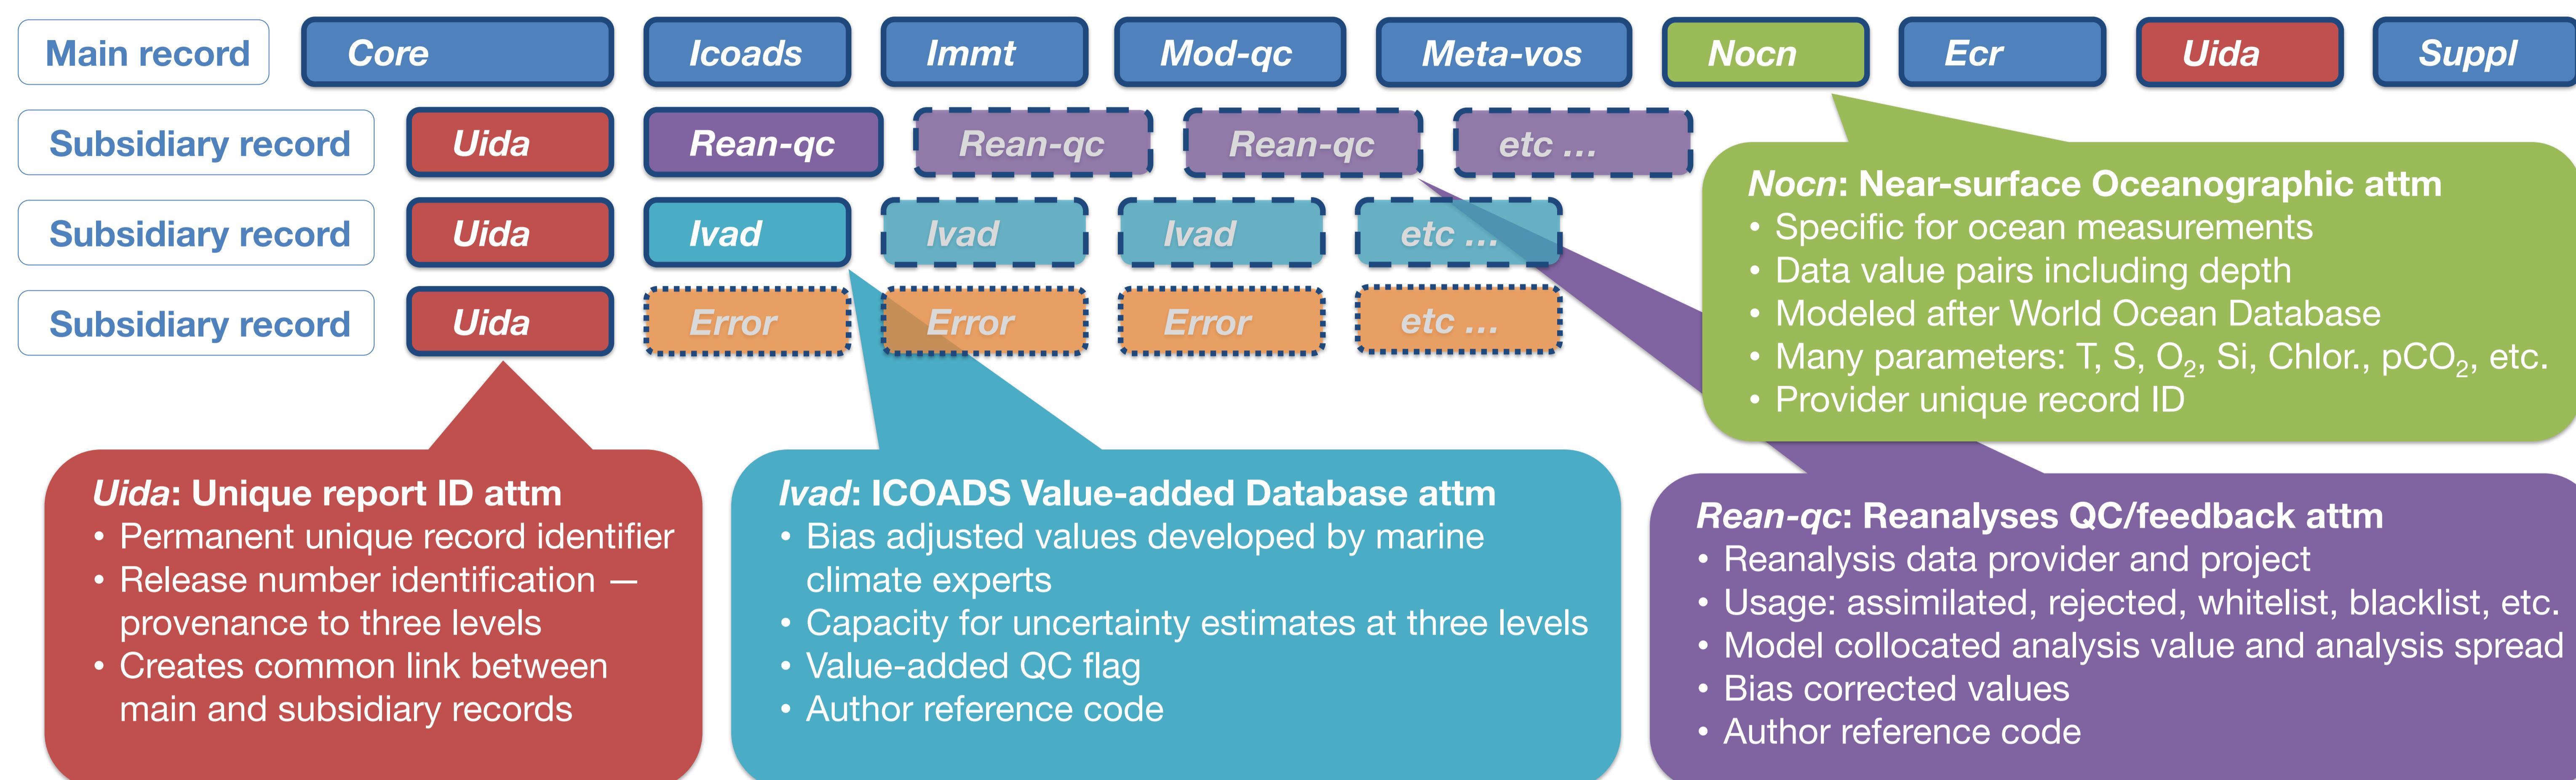

National Center for Atmospheric Research, Computational and Information Systems Laboratory

✉ rda.ucar.edu ✉ tcram@ucar.edu

Background

The International Comprehensive Ocean-Atmosphere Data Set (ICOADS) Release 3.0 is a foundational open access observational archive that further supports reanalysis studies and captures significant components of the data life cycle. For more information about the data and metadata characteristics of ICOADS, see the companion poster "ICOADS Release 3.0: Data characteristics and future priorities" (E. Freeman)

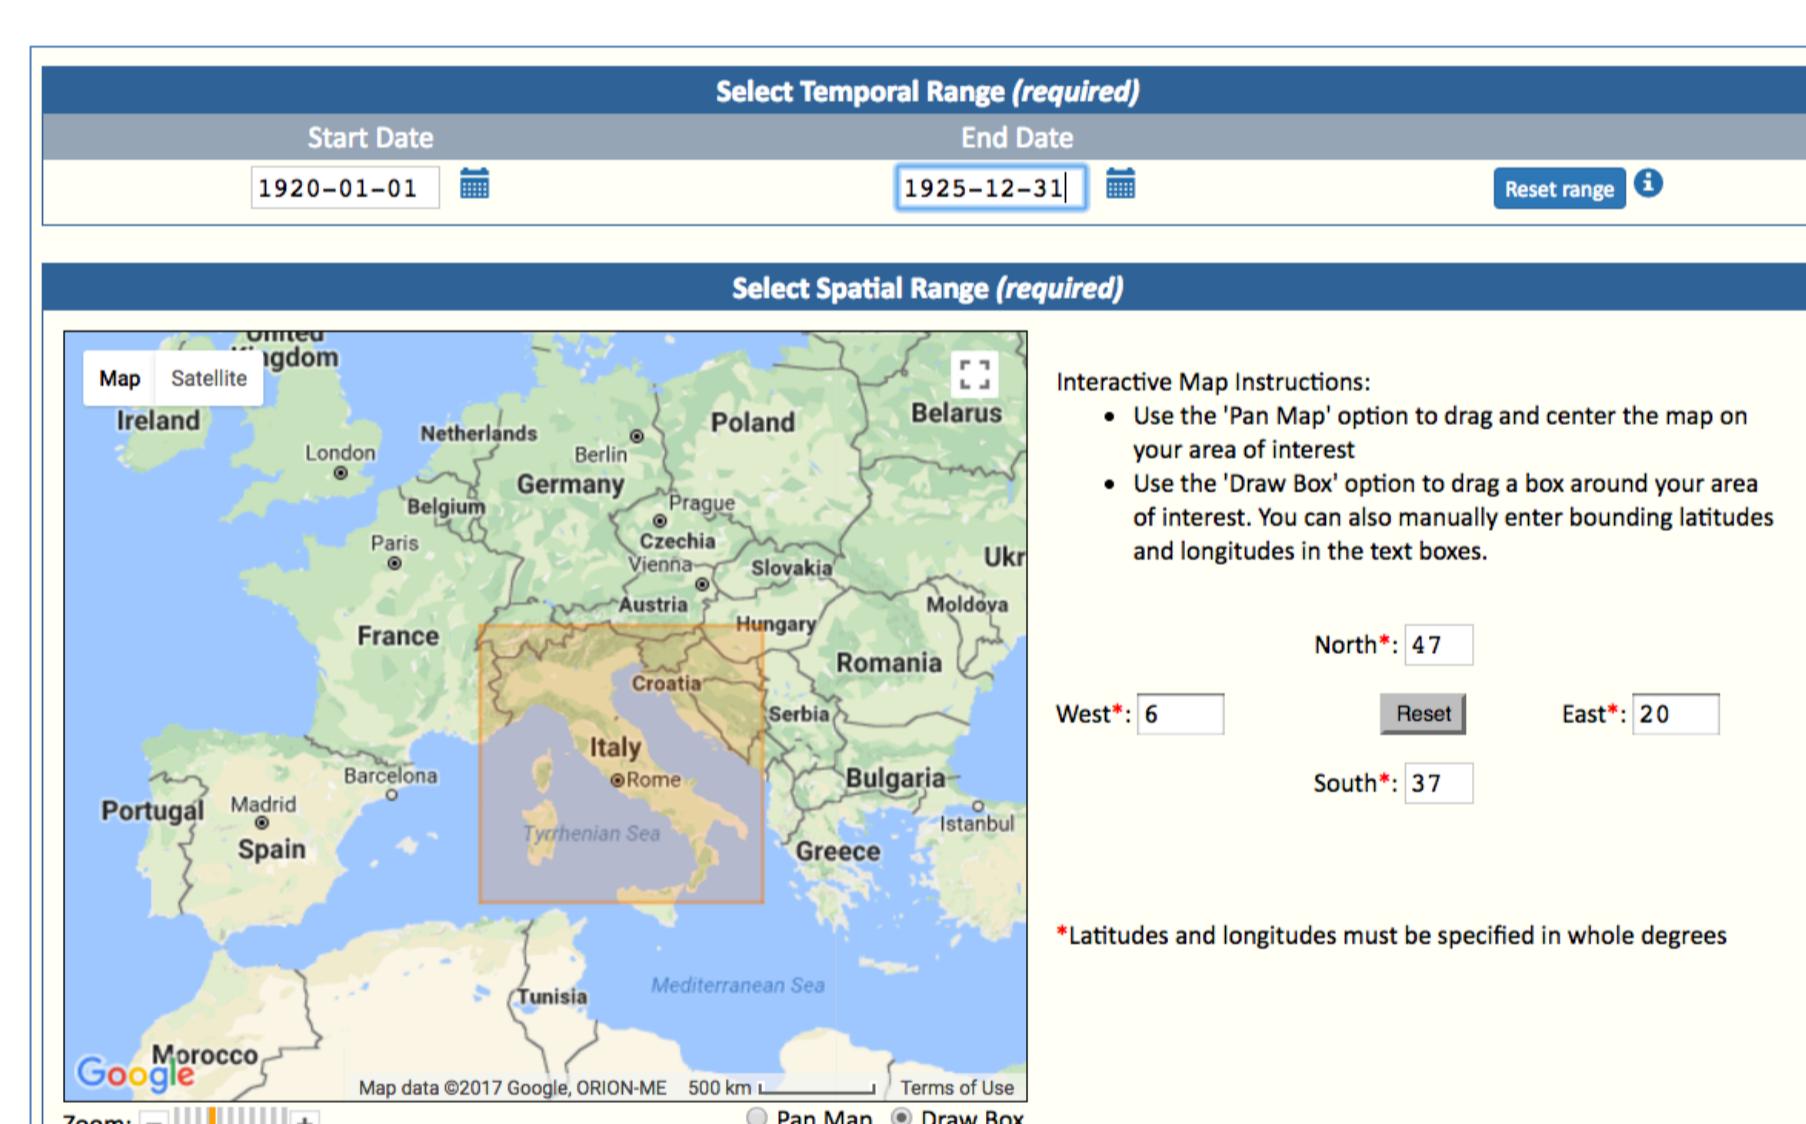

IMMA1 format: multi-line linked report supports record tracking, user feedback, and feature growth

Data products

NCAR

- Release 3.0.0: Main records only
- Release 3.1.0: Main records plus subsidiary records
- Release 3.0.1: GTS Near real time
- Monthly summary products
- Standard, enhanced, and user-defined trimming options
- User interface for subsetting and quality flag application

NOAA/NCEI

- Enhanced trimmed and untrimmed observations
- NetCDF-4 archive

NOAA/ESRL/PSD

- Monthly summary statistics (NetCDF)
- User interface for subsetting and visualization

Data access

NOAA/NCEI: icoads.noaa.gov

NCAR: rda.ucar.edu/datasets/ds548.0

IMMA1 documentation

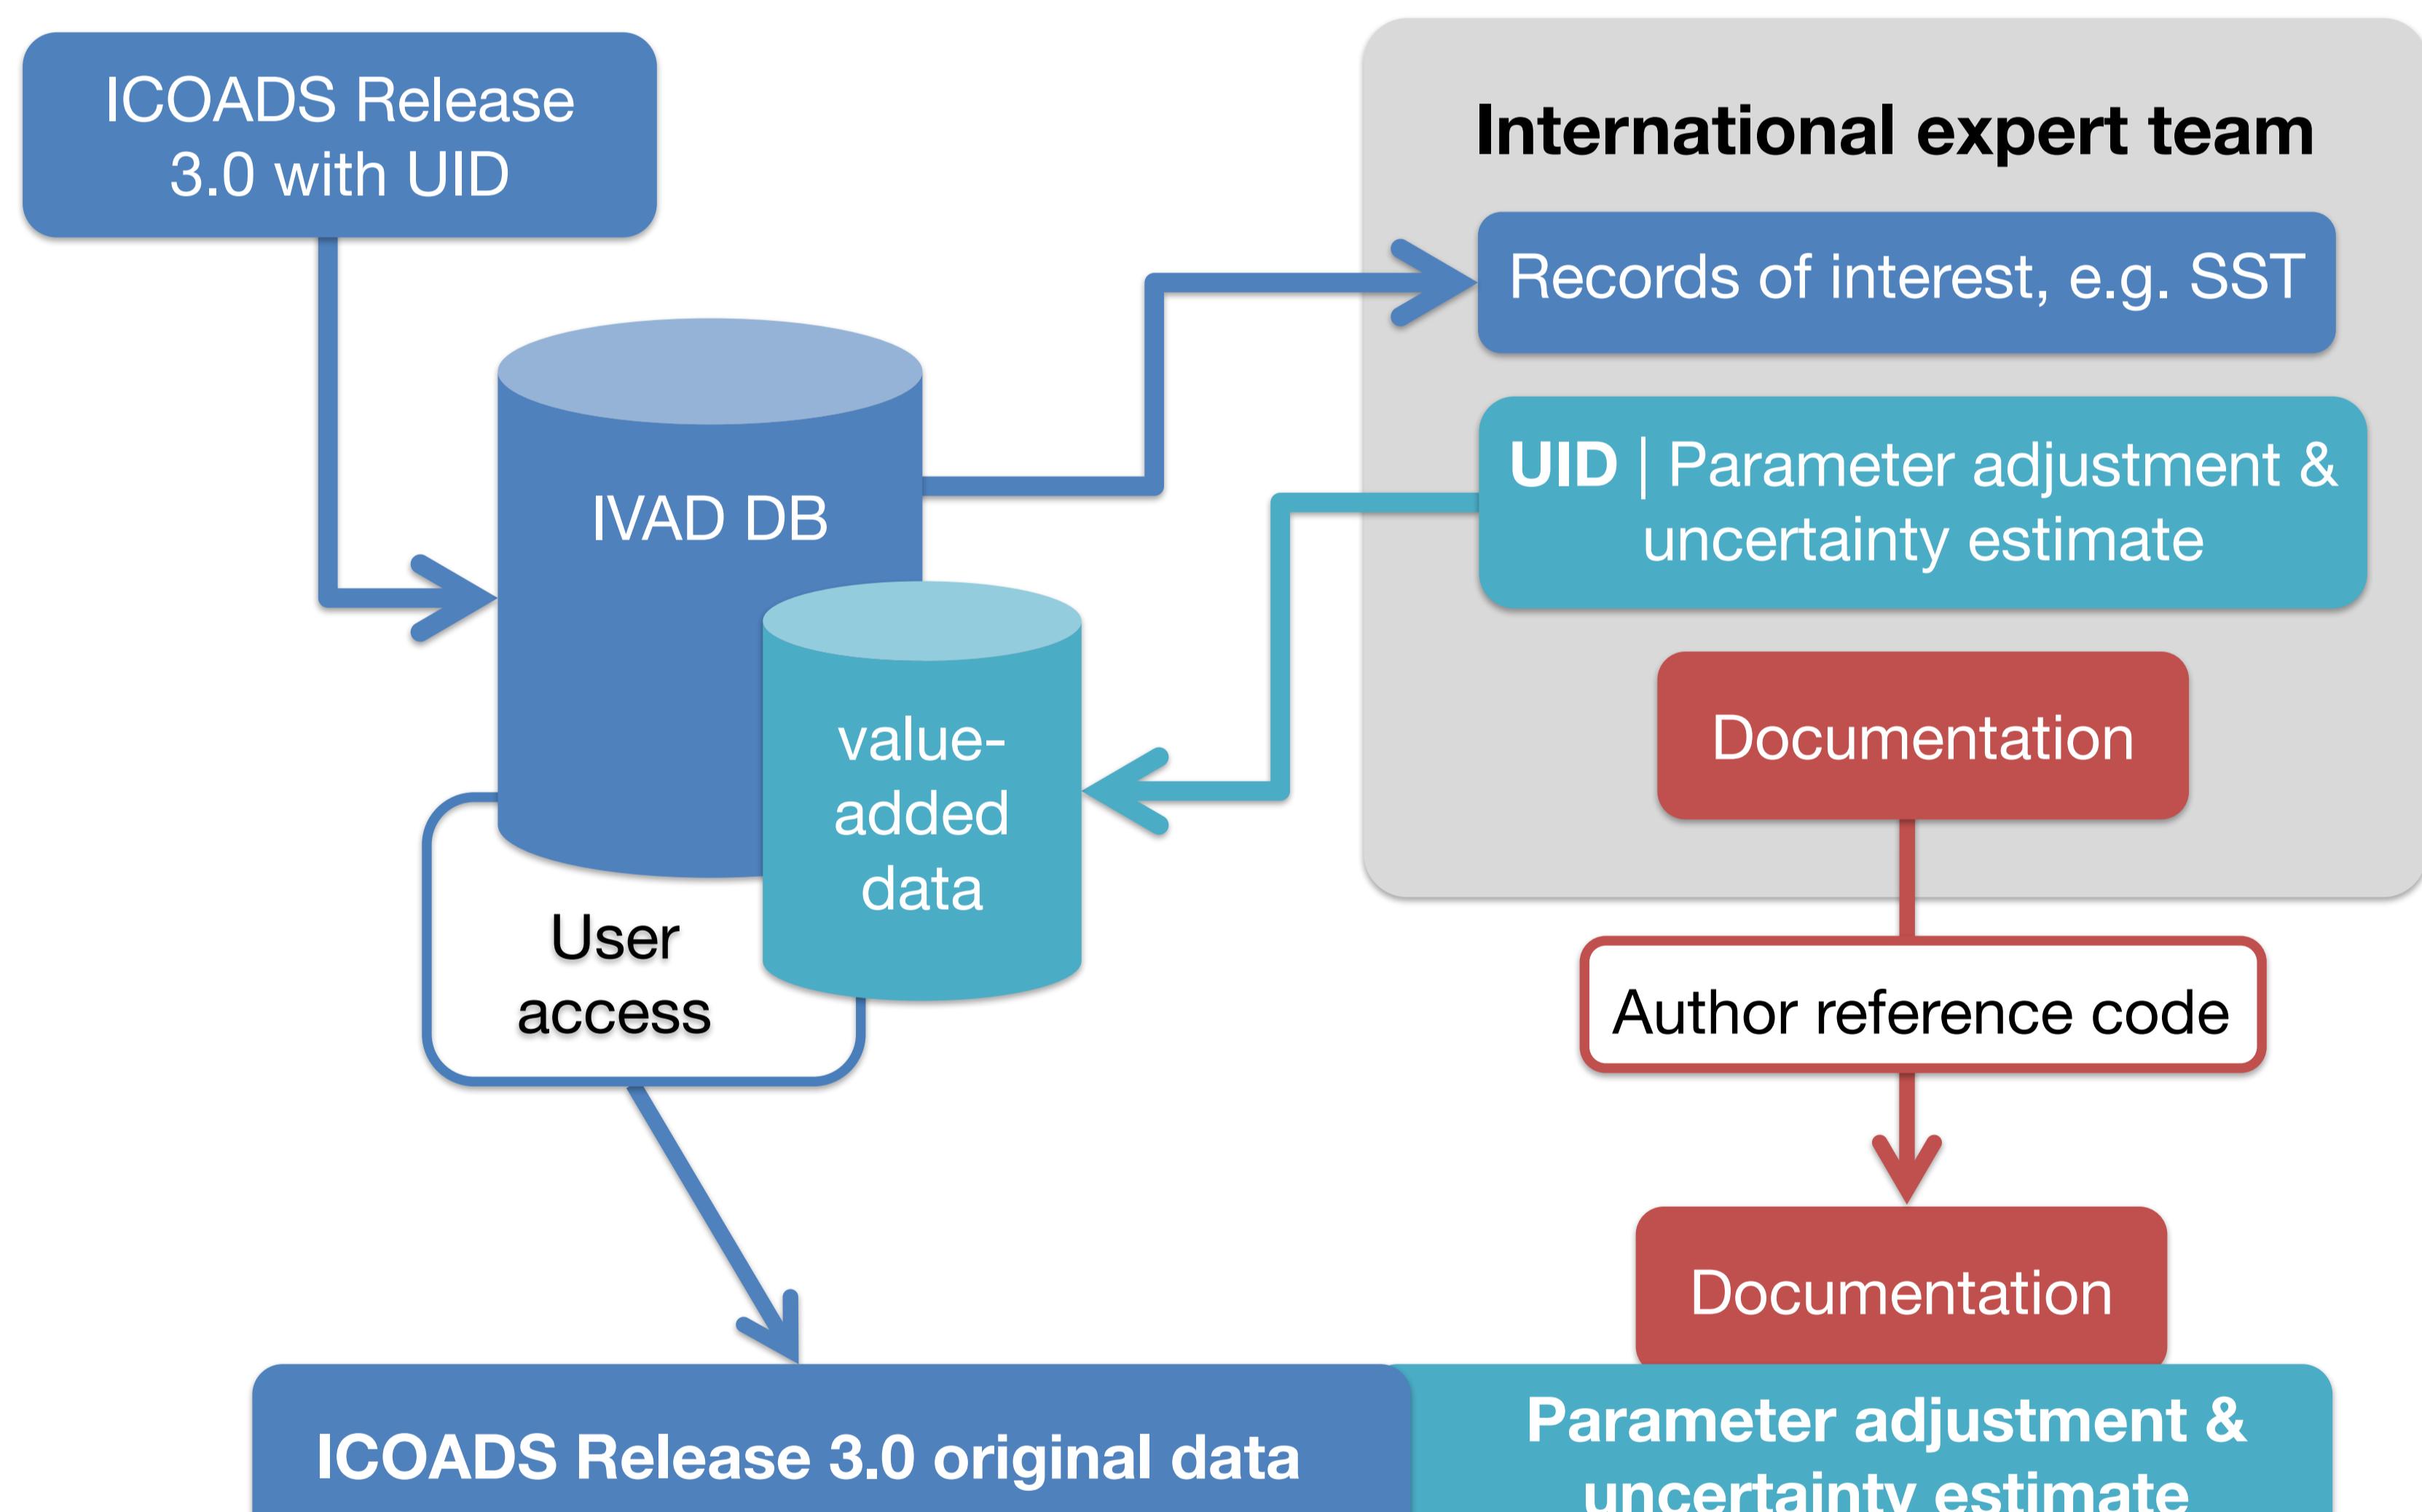

icoads.noaa.gov/e-doc/imma/R3.0-imma1.pdf

ICOADS Value-added database (IVAD DB): Data flow, feedback management, and user access

Additional Ivad & Rean-qc submissions are welcomed and encouraged!
– Contact the ICOADS team at NCAR for details

Current Ivad & Rean-qc attms

- Berry et al. (2004) air temperature adjustment
- Smith et al. (2015) Beaufort wind adjustment
- ECMWF ERA-20C feedback
- ECMWF CERA-20C feedback

Potential future Ivad & Rean-qc attms

- FSU Atlantic marine wind indices (S. Smith)
- ECMWF ERA-5 feedback (?)
